

FINANCE MANAGER / CONTROLLER- ENERGY STARTUP

You are not interested in being just a cog in the wheel and want your work to help solve the climate change crisis? Then HYDROGRID is the place to be!

Our mission at HYDROGRID is to optimally control hydropower plants in real-time through our in-house developed SaaS/IoT solution and thereby make hydro power plants – the best source of renewable energy – even more efficient. With the help of sophisticated machine learning algorithms, our software can accurately align power generation with weather and power market prices. By doing so, we automate processes, save time, and increase revenues by up to 18%.

To further support our rapid growth, we are looking for a

Finance Manager / Controller (m/f)

Your Contribution

- Annual budgeting process and continuous tracking of plan vs actual
- Prepare annual accounts & company balance sheet in cooperation with the company's tax consultants and financial auditors (book accruals/deferrals, ...)
- Monthly preparation & independent validation of financial accounting (accounts receivable, accounts payable, fixed assets and general ledger) in cooperation with the company's tax consultant
- Monthly preparation and audit of customer billing and accounts receivable
- Monthly validation of payroll accounting & social security in cooperation with the company's tax consultant
- Continuous validation and audit of national & international tax obligations (e.g. VAT, 'Zusammenfassende Meldung')
- Processing of payment transactions
- Liquidity planning and cash management
- Application, financial planning and accounting for grant applications (National, EU)
- Design and tracking of company key KPI's for internal and shareholder reporting
- Maintain master data and accounts, and further develop processes and projects

What we are looking for

- Profound education in Business and / or Finance (university degree)
- At least two years of professional experience in the field of finance
- Independent, proactive and structured way of working
- Distinct understanding of financial 'best practice' processes
- High attention to detail & sense of responsibility
- Proficiency in MS-Office, in particular excellent knowledge of Excel and PowerPoint
- Very good written and spoken German and English - fluency in business English is essential as this is our team working language
- Good IT skills, knowledge in VBA and / or of any programming languages is a plus
- Completed accountant examination is a plus
- Previous experience of working in a startup and knowledge of startup financing & investor relations management would be a huge plus

What we offer

- The possibility to shape the growth and success of an innovative technology company
- Rapid career development opportunities & support for your growth
- An awesome team and an international working environment (English as primary team language)
- The spirit and energy of a startup combined with the professional standards and customer focus of an enterprise
- Varied and autonomous field of activity
- Modern working conditions based on flexible working hours and the option of home office
- Goodies like Wiener Linien Card, unlimited coffee, tea, and your very own HYDROGRID pen

The position is possible full-time or part-time depending on individual experience and other factors - We offer a base salary starting at €42.000 per year (full-time equivalent) and offer appropriate overpayment based on individual skills and previous experience.

Our international team (currently 7 nationalities) works passionately to optimize hydropower and improve the global energy mix towards a future with sustainable power generation. We value great ideas, trust, and independent & creative thinkers and would love to welcome you to our team.

If you are also interested in making an impact and solving the global energy issue, please send your application including your CV to join@hydrogrid.eu and tell us your motivation to join our pursuit of a future with renewables.
